May 8, 2009.

Hi Duanne,

As much as I'm sure you've received many notes of thanks for your great house building talents over the years, I thought it worthy to send you some historical perspective comments from one of your earlier clients. Can you believe it...ten years since we moved into our Piney Island house!

Back then taking on a truly custom house of 4,000+ feet was a big step however the years have certainly proven that you and your team at Piney Island knew what they were doing and not only built a beautiful high quality house but one that has stood the test of time. In my job I go into a lot of homes that have all sorts of problems caused by poor workmanship and cheap materials. It really makes me appreciate our place and the guidance you gave us in building to last. I also appreciated the customer care you provided in fixing things that many other contractors would have shrugged a off as "not my problem now".

So here's to you and your team on a 10 year anniversary.  
Thanks for the ongoing memories.
